

Taclo llygredd gwasgaredig Tackling diffuse pollution

The Catchment Initiative aims to tackle diffuse pollution. Six priority catchments have been identified across Wales and each one has a dedicated Catchment-Co-ordinator.

They offer advice and guidance to farmers on: manure and slurry management, nutrient management, soil protection, clean/dirty water separation, sheep dip practice, water efficiency and pollution prevention.

This helps farmers save money whilst keeping rivers clean.

“The work of the Catchment Initiative has certainly demonstrated the benefits of nutrient management on our farm which will help us grow grass efficiently and will help reduce the amount of nutrients lost to the environment.”

Rhys Evans, Troedyraur Farm, Brongest, Ceredigion

For further information contact the Catchment Co-ordinators:

Clwyd Nichola Taylor 01248 484173
Cain Richard Dearing 01743 283470
Wye Ioan Williams 02920 582754
Usk Sarah Coe 02920 582728
Cleddau Brian Klass 01437 783037
Teifi Phil Morgan 01554 713619

Mae'r Fenter Dalgylch yn anelu at daclo llygredd gwasgaredig. Nodwyd chwe dalgylch â blaenoriaeth ledled Cymru ac mae gan bob un Gydlynnydd Ddalgylch penodol.

Maen nhw'n cynnig cyngor ac arweiniad i ffermwyr ar: reoli tail a phiswail, rheol maetholion, amddiffyn y pridd, gwahanu dŵr glân / budr, trin dip defaid, effeithiolrwydd dŵr a rhwystro llygredd.

Mae hynny'n helpu ffermwyr i arbed arian a hefyd yn cadw afonydd yn lân.

“Mae gwaith y Fenter Dalgylch ar ein fferm yn bendant wedi dangos manteision rheoli maetholion a bydd hynny'n ein helpu i dyfu glaswellt yn effeithiol ac yn ein helpu i golli llai o faetholion i'r amgylchedd.”

Rhys Evans, Fferm Troedyraur, Brongest, Ceredigion
