

All Planning Applications Objected to by the Environment Agency on Water Quality Grounds Between 01/04/2010 and 31/03/2011

We have provided below a list of the objections lodged on Water Quality Grounds to assist Local Authorities who are doing their annual monitoring reports. The list is designed to be as inclusive as possible and produced annually. It is not updated to take account of any additional comments/consultation responses after the initial objection as the Local Authority records are more complete than ours – it provides a starting point for Local Planning Authorities to check their own records.

The “Reasons for Agency Objection” referred to in this document are:

Insufficient Info - Water Quality	We use this when we do not have enough information to assess the risk properly
Mains drainage - unacceptable risk to water quality	We use this objection when the potential risk to water quality is too great – Specifically regarding mains drainage
Non-mains drainage – unacceptable risk to groundwater/surface water	We use this objection when the potential risk to water quality is too great – Specifically regarding groundwater/surface water
Non-mains drainage proposed in sewered area	We use this objection when non-mains drainage has been proposed in an area which has a working sewerage network
Required Circular 3/99 or 10/99 Assessment	The Department of Environment Transport and the Regions Circular 3/99 and the Welsh Office Circular 10/99 recommend that all developments involving non-mains drainage for foul water have an assessment of the environmental consequences. We use this objection if it hasn't been provided
Unacceptable risk to water quality	We use this objection when the potential risk to water quality is too great
Unsatisfactory Means of Disposal (Trade/ Sewage/Trade & Sewage)	This objection is for when the means of disposal of waste is a risk to the water quality
