

## Number of environmental permits in force and operational between 2004 and 2007

\*in 2007 the number of landfill sites includes those with an appropriate environmental permit that meets Landfill Directive requirements, those still operating subject to outcome of an appeal for the refusal of a permit, and those operating under an agreed extension that will close by July 2009.

\*\* the agreed number of incinerators includes only those that accepted waste from off-site sources. It does not include facilities that burn their own in-house process waste.
